## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-7 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1-7 are allowed because prior art fails to teach or make obvious an X-ray digital tomographic image taking apparatus comprising: a control unit for controlling the emissions of an X-ray generation unit and the drive of solid state image sensing unit, wherein the control unit divides the course along which the X-ray generation unit or solid state image sensing unit is moving into a plurality of sections and controls the X-ray generation unit so that the quality of the x-rays differs between neighboring sections as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bisek et al. (Re. 36,162); Carbal et al. (US Patent 6,102,567); Wilson et al. (US Patent 6,496, 557 B2) and Stein et al. (US Patent 5,715,820) teach dual-energy topographic image taking methods and apparatus wherein the X-ray

Art Unit: 2882

generation units or solid state image sensing units are moving into a plurality of sections producing desirable images with dual-energy subtraction without changing the X-ray irradiation conditions such as tube current, tube voltage and X-ray irradiation time between neighboring sections.
